### Education

#### Full Stack Software Developer, Coder Foundry Bootcamp [🔗](#)

01/2023 – 03/2023

- Created StatTrack [🔗](#), a fully functional multi-tenant issue/ticket tracking system using ASP.NET Core MVC and PostgreSQL. Enables companies to track projects and the lifecycle of the trouble tickets within. Implemented user and role-based security to establish separation of duties
- Created a blog platform hosted on Railway called Tecture [🔗](#), a blog site using ASP.NET Core MVC and PostgreSQL. Implemented a role-based security system, file upload, search, and email service. Designed to be easily packaged and shipped to others for hosting and use. Database interaction is done through LINQ to Entity Framework. Established an API to push blog posts to my portfolio
- Created LinkList [🔗](#), a fully functional contact management site using ASP.NET Core MVC and PostgreSQL. Enables users to store contacts, filter by category, search, and email contacts directly or by category. Database interaction is done through LINQ to Entity framework
- Created Portfolio [🔗](#), a static site to showcase my abilities as a developer using HTML, Javascript, CSS, and Bootstrap. Called on the Tecture [🔗](#) API to populate blog posts.
