PostgreSQL

Education

Software Engineering & Development,
Coder Foundry Bootcamp 🔗
01/2023 – 03/2023 | Kernersville, USA

Junior Full-Stack Java Developer,
Generation USA
03/2022 – 07/2022

- Enrolled in an intensive 15-week Junior Full Stack Java Developer program, dedicating over 460+ hours to mastering key technologies required for developing full-stack web applications with Java, specifically utilizing the Spring Boot Framework.
- Acquired in-depth knowledge of HTML5 and CSS3, employing these technologies to create visually appealing and responsive user interfaces.
- Demonstrated proficiency in implementing basic unit tests to ensure the functionality and stability of the developed application.
- Successfully deployed the application to Heroku, a cloud platform, enabling seamless accessibility and efficient deployment.

Professional Experience

Full Stack Web Developer, *Coder Foundry* 🔗
01/2023 – 03/2023

- Developed StatTrack 🔗 , a secure multi-tenant issue tracking system using ASP.NET Core MVC and PostgreSQL. Implemented user and role-based security to ensure separation of duties and enable companies to track project lifecycles.
- Designed and created Techture 🔗 , a secure blog platform using ASP.NET Core MVC and PostgreSQL hosted on Railway. Implemented role-based security, file upload, search, and email service. Established an API to push blog posts to my portfolio and designed it for easy packaging and shipping for hosting use.
- Constructed LinkList 🔗 , a secure contact management site using ASP.NET Core MVC and PostgreSQL. Allows users to store contacts, search, filter by category, and email contacts directly or by category. Database interaction is performed with LINQ to Entity framework.
- Built a static portfolio 🔗 site to showcase my development skills using HTML, Javascript, CSS, and Bootstrap. Utilized Techture 🔗 API to populate blog posts.

Junior Automation Engineer, *2barrels* 🔗
08/2022 – 12/2022

- Developed comprehensive automation scripts utilizing Node.js, Javascript, and Puppeteer to streamline processes.
- Collaborated with agile team members to troubleshoot and resolve issues within the Jira platform.
- Utilized Git version control to manage code and deployed branches regularly.

Claims Generalist Associate,
Progressive Insurance
10/2019 – 12/2020

- Conducted comprehensive examination of insurance contracts to ensure optimal resolution of assigned claims for both the company and clients
- Managed a high-volume portfolio of 250-300 new claims on a monthly basis, while effectively coordinating departmental objectives and office administrative tasks in a fast-paced work environment
